

A Petition
to
The International Fraternity
of
Delta Sigma Pi
by
The Commerce Club
University of Arizona
Tucson, Arizona

To the Grand Council of the
International Fraternity of Delta Sigma Pi

Gentlemen:

We, the undersigned members of
the Commerce Club do hereby petition
for a charter to establish a chapter
of the International Fraternity of
Delta Sigma Pi *****
Arizona, Tucson, Arizona.

A PETITION

Organized in accordance with the
purposes and high ideals and standards
of Delta Sigma Pi, the membership in
group action in DELTA SIGMA PI
unanimously agreed to present this
petition for con*****

We pledge ourselves to uphold
the Constitution and By-laws of the
Delta Sigma Pi Fraternity and to
faithfully observe its rules and
regulations.

To the Grand Council of the
International Fraternity of Delta Sigma Pi.

Gentlemen:

We, the undersigned members of
the Commerce Club do hereby petition
for a charter to establish a chapter
of the International Fraternity of
Delta Sigma Pi at the University of
Arizona, Tucson, Arizona.

Organized in accordance with the
purposes and high ideals and standards
of Delta Sigma Pi, the membership in
group action in regular assembly
unanimously agreed to present this
petition for consideration.

We pledge ourselves to uphold
the Constitution and By-laws of the
Delta Sigma Pi Fraternity and to
faithfully observe its rules and
regulations.

The Baby State

By M.E. Wilson

Anyone who is the least bit familiar with "The Baby State" knows that it isn't a wild-and wooly section where bandits pop out at crossroads, or on desert trails rattlesnakes are always around, and shooting is the order of the day. They'll tell you that although Arizona is definitely and authentically and delightfully western in all that the word suggests--and that most communities try to keep it that way--it has few hazards, and many charms. One never sees a bandit, only rarely a rattler, and although at rodeo time in Phoenix and Tucson and almost every town in the state, two gun men are all over the place, there's not the slightest danger of being plugged while buying the home town newspaper. Besides, one learns that rattlers attack folks who bother them... and that they don't seek out victims; and that the bright gleam in the Vigilante's eyes as he calculates how far above your head to shoot their blanks is one of merriment.

The informality of the West has naturally seeped throughout ranch country and invaded every town and city. Or perhaps it is more accurate to say that since ranching and pioneering came before modern towns and villages, an unconventional way of living has become as much an integral part of the life as the bowed legs of the cow-punchers. There's a time-worn cliché that when you see a man wearing a coat on a warm Arizona day, you can safely gamble on one of two things.... he's either an uninitiated newcomer, or is wearing a dirty shirt!

And for those who would like to get away from the more formal type of life, it is mighty nice how things are arranged nowadays. Folks can grab a plane in New York City in the morning and have supper, ranch or resort style, in the desert near Tucson that evening. You can go to bed on one of those big, fine, fast trains leaving Chicago in the evening and a perky station wagon will be speeding you out to some Arizona Ranch or lodge in a couple of days. Modern Transportation has made Fifth Avenue in New York practically just across the street from main in places like Douglas, Nogales or Tucson.

No matter how deep you are in winter or snowdrifts elsewhere, you will find that the sun is always shining in Arizona. There are folks living on the desert who have never built a snowman. The closest they have ever gotten to snow is to view it wonderingly forty miles away on snow-covered mountain peaks placidly surveying the warm world below. The Arizonans do not seem to mind not having snow, though; they seem to be very happy with the fresh air and much sunshine.

The Progressive State

The territory of Arizona in 1898 was a thriving community of 122,931 people. That was quite a population! One sixth of them lived in Maricopa County whose population was 20,457--and of that number, Phoenix boasted 5,544 residents. But Tucson and Prescott were bigger! Over the period of time 1898 until the present, the economy of the state was strengthened by four C's--Cattle, Copper, Cotton, and very importantly, Climate.

This portrait of winter in the Sun Country of Arizona is a delightful contrast to less favored parts of world where the snows are deep.

From 1898 to the present, the percentage of growth of Arizona has increased more than any other state excepting Oregon...Almost ten fold. The economy was strengthened more by the extensive use of irrigation than any other single item, that is along with wonderful climate. The cities of Phoenix, Tucson, Douglas, Bisbee, Globe and Prescott have all increased tremendously in population and area.

Phoenix, the state capital and largest city of the group is surrounded by very good irrigated farm lands which occupy the valley along with the city. In structure, Phoenix might easily be compared with Los Angeles, California in that the way the city is laid out.

Tucson, being an old presidio or walled city is older than the other cities and the history behind Tucson is rather colorful. The walls that were originally around Tucson were to form a kind of fortress for the protection of the inhabitants. Today, parts of the wall still stand as a reminder of days when Indians were warlike and hostile tribes were in abundance.

Bisbee, Globe and Douglas have grown mainly because of minerals found there. Copper, gold and zink are among the more valuable metals that are mined in these cities. Prescott, in the northern part of the state and once the state capital, is mainly a logging town with the United States' largest supply of virgin timber surrounding it.

Of all the cities, the greatest rivalry between any of them is between Phoenix and Tucson. At one time Phoenix, the state capital, had a choice as to whether they wanted the State hospital for the Mentally Ill, or the State University.

After much bickering, Phoenix decided to take the hospital because it seemed less trouble than the School. That is how the University of Arizona came to rest in Tucson...Now, Phoenix and the Phoenicians have initiated the idea of moving the University to Phoenix, but the residents of Tucson have grown very fond of the school and up to the present and in the far distant future the college will remain in the "Old Pueblo".

The Saguaro is the state flower of Arizona.

TUCSON

"THE OLD PUEBLO....."

SAN XAVIER MISSION

A HISTORY OF TUCSON

By Duane Langliers

Nestled among the picturesque mountain ranges in the southern part of Arizona is Tucson, home of the University of Arizona. The Old Pueblo, as Tucson is often called, is a city where the old mingles with new, the past with the present. In the very shadows of a city, fresh with tall, modern buildings, lie the sombre adobes. This is old Tucson, reflecting the past, upholding their traditions; a Mexican pueblo that was to become a bustling, progressive city. To appreciate the picture, the background must be studied.

Tucson's history was old long before the coming of the Spaniards. Here an ancient people lived and mysteriously vanished, leaving the crumbling ruins of buildings, and pottery. After them came the Indian tribes that we know today--the agricultural Papagos, the war-like Apaches, and others.

Next came the Spaniards, even before the Pilgrims had landed at Plymouth Rock. First the soldiers and adventurers traveling northward in their search for gold and the Seven Mysterious Cities of Cibola, then the Jesuits and Franciscans establishing their missions for the Indians. At this time, about 1700, Padre Kino started to build the now famed mission San Xavier del Bac, to the south of the Indian village, Tucson.

Soon to arrive were the bold traders and frontiersmen, settlers and cattlemen. During the year 1776, an adobe wall was built around Tucson, making it America's first walled city. Until 1900 the Old Pueblo remained a tough little frontier town,

its quiet broken by frequent Indian raids or the barking guns of lawless badmen or hilarious cowboys.

The American flag first flew over Tucson in 1846 when Lt. Col. Phillip St. George Cook led the Mormon battalion thru to the Pacific. The flags of three other nations have flown over the city--those of Spain, Mexico, and the Confederacy. Tucson was a part of the Gadsden Purchase of 1853, and was occupied in 1856 by the United States Dragoons. In 1870 the Old Pueblo had a newspaper, four restaurants, one hotel, one brewery, thirteen stores, two doctors, thirty-seven saloons, and one bathtub owned by the local barber.

From a population of 7,531 in 1900, the city has rapidly expanded to a metropolitan population of 126,850 today. Helping Tucson to progress are the university, a large air force base, aircraft and electronic industries, and a growing health resort fame. Here also is the guest ranch center of the Southwest.

During the month of February the automobiles of Tucson share the streets with horses. The vigilantes once more take the law into their own hands, for this is the month of the annual rodeo, La Fiest de Los Vaqueros. This is the Old Pueblo and modern Tucson.

R HENDERSON

A friendly winter sun adds a cheery note to the shows and events which take place in the Sun Country of Arizona during January, February, March, and April. *La Fiesta de Los Vaqueros* (above) is Tucson's big rodeo event in February. The Phoenix World's Championship rodeo is held in April. Below, a view from the Stock Show held annually down Tucson way. Guests from all over enjoy the truly western atmosphere.

THE UNIVERSITY
OF
ARIZONA

AERIAL
VIEW
OF
CAMPUS

UNIVERSITY OF ARIZONA

A Short History

By Robert Lowe

Today Tucson takes boastful pride in being the home of the University of Arizona, and its 85-acre campus laid out in drives, lawns and gardens shaded by palm, pepper, olive, ash, cedar, juniper and orborvitate trees provides an inviting oasis for the more than forty classical and distinguished buildings which house the colleges, offices and dormitories. Today this beautiful site is a sightseeing must for the annual winter tourist trade. But in its beginnings, back in 1885, when the University was given to appease the townfolks' anger in its being by-passed as the territorial capital, the idea of having such a school created nothing more than disinterested apathy.

Tucson was supposed to supply the land upon which the college buildings would be erected, but as no one had any enthusiasm for the prospects of a university, nothing was done about acquiring a site until 1891. Then, with the grant about to lapse, two fore-sighted citizens, Selim Franklin and George Roskruge, who realized the advantages in having a university in Tucson hurriedly sought a location for it. They decided upon 40 acres about a mile from town, the land being given to the prospective college by its owner who said it was "so far out of town, it's not worth paying taxes on."

This entertaining reaction to those 40 acres of desert not only gave the university its now-charming site, it changed the whole trend in real estate development in Tucson. Until

then, the town had been spreading toward the south and west. But after the University opened with three departments--the College of Agriculture, the College of Mines and Engineering, and an Agricultural Experiment Station--a new residential district grew up about the campus and gradually extended further to the north and east to make what is now Tucson's better living area.

In 1891 the University was opened to students. Out of the first enrollment of 31 students only six were of college rank. Much of the curriculum was preparatory, since there were no high schools in the state at that time. There were six teachers to face the students in daily sessions that first year.

The development of the university was slow for the first two decades largely because the early presidents tended to be partial to local interests. However, in 1913 an appropriation of \$165,000.00 was passed for an agricultural building. This marked the first real progress of the institution. Under the administration of R. B. Von Kleinsmid, who was selected as president in 1914, registration increased from 451 to 1732. The faculty was also enlarged, Seward Observatory secured, and the offices of Dean of Men and Dean of Women created.

In the year 1917 the University of Arizona was placed on the Accredited list of the North Central Association of Colleges and Secondary Schools as a degree-granting institution. The Association of American Universities placed the University of Arizona on its list of approved colleges in November, 1924.

COLLEGE OF AGRICULTURE

In 1930 the College of Law was placed on the list of approved law schools of the American Bar Association, and in 1931 it was admitted to membership of the Association of American Law Schools.

Student life has always played an important role at the University. The Philomathean Society, an early organization, presented plays and promoted debating. A cadet band made its first appearance at cadet drill in 1902. The first weekly paper, "The Varsity Gridiron", came out in 1902. In 1925 the "Arizona Wildcat" was first published, and it still exists today as the student newspaper. The Wranglers were organized in 1915 to meet for informal discussions of recent books. After 1917 fraternities and sororities began to rule college politics and dominate social life.

The military began early to weave its way through the life of the campus. The late Edward M. Boggs established the first cadet battallion on the campus, of which he was Commandant in 1896-97. He had had his military training at Ohio State University and wished to see like opportunities made available in Arizona. Having heard that in Wipple Barracks, near Prescott, there were stored some Springfield rifles, relics of the Civil War which had been forwarded to Arizona for the use of settlers against Indian raids and never put into service, he secured permission to send for them. They were so obsolete in type that the Government set no value upon them, merely requiring that the University pay the freight. The rifles were exceedingly long and heavy.

COLLEGE OF LAW

Mr. Boggs recalled that one young lad, Walter Wakefield, was four inches shorter than his gun, making it necessary to take off the barrel and replace it with a wooden one for his use in military drill. Military regulations soon permeated the entire discipline of the campus. In 1896 the University issued "Regulations for the Government of Students," in which it was stated that "Any student absent from quarters after taps, or at any other time longer than half an hour will be punished as if beyond cadet limits". Also the rules stated, "No young lady shall leave the dormitory without a permit from the Governor of the barracks." A familiar sight for many years was a stiff line of youngsters, drawn up on parade ground in the pelting sun, "doing extra duty" for engaging in a pillow fight, or otherwise overstepping the bounds of cadet propriety.

The University of Arizona's most memorable athletic tradition is the slogan "Bear Down," which was given to Wildcat teams by John "Button" Salmon, President of the student body and varsity football quarterback and baseball catcher, shortly before he died in 1926 following an automobile accident that occurred during the gridiron season of that year. "Button" Salmon's last message to his teammates, spoken to J. F. McKale, athletic Director, were "Tell them to bear down." The term Bear Down is painted in large block letters atop the men's gymnasium. He had aspired to be a varsity athlete from the time he entered the university. For three years he was just one of the many who in words of a coach, just was not good enough. He would not be denied, however. His was a fighting

MEN'S GYMNASIUM

heart and he battled his way to the top.

One of Arizona's greatest traditions has been the annual painting of the "A". In the fall of 1915 Arizona won a hard fought football game. As a result of this victory there was great excitement on the Arizona campus and several of the boys went to town and proceeded to paint an "A" on the station platform to welcome home the victorious team. After this "A" was painted they decided to paint more little "a's" all over town, which they did--about two jumps ahead of the police force. This resulted in a close chase by the police and the mob ended its struggle at what is now the foot of "A" Mountain. That night the first "A" was built. It was a frame covered with cheese cloth. This "A" lasted only a week, after which time the student body took it upon themselves to build the present permanent letter out of rocks. It was started in October, 1915, and after much work, was completed the fifth of May, 1916. The dedication and first "A" Day celebration was held on campus that night. At that time it was decided to have a special day set aside to be known as "A" Day. The first Saturday after registration was selected, and since then the Freshman class has whitewashed the "A" every year on that day.

Thus it can be seen that the history of the University of Arizona has been both varied and colorful. It has been expanding steadily and rapidly since its beginning in 1891. The last building to be constructed, a new Liberal Arts building, was completed in 1950; and a new Business and Public Administration building is expected to be under way by September, 1951.

COLLEGE OF LIBERAL ARTS

THE UNIVERSITY TODAY

The University of Arizona, located at Tucson, is an integral part of the system of public education established by and for the state. Its purpose, in the language of the organic law, is "to provide in inhabitants of this state with the means of acquiring a thorough knowledge of the various branches of literature, science and arts," and, in so far as possible, a technical education adapted to the development of the resources peculiar to Arizona. In furtherance of this purpose, the College of Agriculture, the School of Home Economics, the Agricultural Experiment Station, and Agricultural Extension service, the College of Education, the College of Engineering, the College of Law, the College of Liberal Arts, the College of Pharmacy, the College of Mines, the College of Fine Arts, the School of Music, the College of Business and Public Administration, the Graduate College, the Arizona Bureau of Mines, the University Extension Division, the School of Military Science and Tactics, the State Museum, and the Seward Observatory have been organized. In creating the University, the Legislative Assembly wisely unified under one management these various colleges and institutions of higher learning and investigation.

The general organization of the University is in accordance with the Act of Congress of July 2, 1962, known as the Morrill Act, creating the "Land Grant Colleges." The details of its organization and government are regulated by the act of the Legislative assembly of the Territory of Arizona, passed in 1885, and subsequent acts of the Legislature. The University is

COLLEGE OF MINES - DOUGLAS MEMORIAL

COLLEGE OF ENGINEERING

maintained by funds appropriated by the State of Arizona, the United States government, and certain fees and collections.

The University campus, comprising 85 acres, is situated within the city limits of Tucson and includes 40 buildings of modern structure and design to meet the needs of the various departments. A value of nearly eleven million dollars is placed on University Physical holdings. Since the war the University of Arizona has registered its highest enrollments in history; and the student roll for the first semester last year surpassed 6,000. Just before the past war the annual enrollment was only 2,900 students. The first large influx of students following the war came in February, 1946 when 3,063 registered for classes. Over 1500 students are housed on the campus, and about 250 post-war-GI student families are living in Polo Village nearby.

The staff of the University is composed of approximately 600 persons.

A new Student Union building is now nearing completion. This serviceable building will house all student activities and will include a cafeteria, fountain, private dining rooms, and meeting rooms. It will provide the facilities for better unifying the Associated Students. The Student Union will be dedicated as a Memorial to the 4,500 former students who served in the last war and particularly to those who made the supreme sacrifice.

The Board of Regents

The government of the institution is vested in the Board of Regents of the University and State Colleges of Arizona,

WOMEN'S BUILDING

a corporation consisting of the governor and the superintendent of public instruction of the state, ex officio, and eight members appointed by the governor. Appointment is made subject to the advice and consent of the senate. The term of office is eight years, beginning on the date of confirmation by the senate, and continuing until the appointment of a successor. In case of vacancy the governor fills the office by appointment. The board elects a presiding officer, who is president of the board. It also elects its own secretary and treasurer. The Board of Regents has power to control and manage the University and its properties, and to enact laws governing the University.

University Library

The University Library contains all University material that the University owns except the law collection. Emphasized subject fields include fine arts, agriculture, geology and mining, hispanic-America, Arizona, and the Southwest, but standard works in most fields are included. The Library including the law library, contains 215,000 volumes; and acquisitions by gift and purchase during the past several years have totaled between seven and ten thousand per year. Currently received are 1,570 periodicals and serials and fifty newspapers. About 800 serial sets are complete, and several thousand files are incomplete in various degrees of workable value. In addition to materials acquired by purchase, the Library receives Arizona State documents, many university publications by exchange, Carnegie Institution publications, and United States documents.

The law library, which was opened in 1915, is housed in the law building and contains 27,000 volumes. Included in this library are the reported cases of all the jurisdictions in the United States and substantially all of the English reported cases, American and English statutory law, complete sets of the leading legal periodicals, and a carefully selected collection of legal encyclopedias, digests, treatises, and textbooks.

UNIVERSITY LIBRARY

SPECIAL ORGANIZATIONS, ACTIVITIES, AND SERVICES

Associated Students

For the purpose of assuming the privileges and responsibilities of self-government and the direction and control of student activities and enterprises, the student body is organized under the title, "Associated Students of the University of Arizona." The membership of the Association includes all students who are registered in the University and who have paid the student activity fee. Governing authority of the Association includes all students who are in the Student Council and the Student Board of Control. All women students of the University are organized also under the title, "Associated Women Students." This organization deals with matters pertaining to the student life of its members which do not fall under the direct jurisdiction of the Faculty or of the Associated Students. Associated Students business enterprises include the University bookstore and the student fountain. Other A.S.U.A. functions are classified under athletics, publications, and general activities.

There are four official publications of the Associated Students. The Arizona Wildcat, the official newspaper, is issued weekly during the college year. The Desert, the University yearbook, is published by the Association each spring. The Kitty Kat, the official student magazine, is issued six times yearly and combines the former humor publication, Kitty Kat, and the former literary publication, Lit. The Students' Handbook, which is published late each summer, contains a summary of University activities, student traditions social and intramural athletic regulations, general campus

information, and the Associated Students' constitution.

The University Forum Committee

The purpose of the University Forum Committee is to stimulate and to co-ordinate the religious and social welfare activities of the campus and to co-operate with the churches of Tucson. It encourages and assists student and faculty groups that wish to meet informally for study and discussion. Some of the activities that have been emphasized are: chapel services; open forums on religion, economics, politics, and social problems; faculty-student "get-togethers"; social service; and the sponsorship of the Student Religion Council.

Student Guidance Service

The University testing and guidance service is available to all students who wish to have help in mapping out their educational programs, indeciding upon a vocation, or in solving problems of personal adjustment. No charge is made for this service. Students may avail themselves of it any time during the year.

University Concert and Lecture Series

In order that students may not only be provided with ample facilities for study under competent instructors but may also have the opportunity of hearing the best in music, drama, and lecture, the University sponsors the University series. Upon completion of registration, all students who are registered for 6 or more units of credit in the University are entitled to tickets for the attractions offered on the series upon presentation of registration fees receipt and payment of tax.

COLLEGE OF FINE ARTS

HONORS AND FELLOWSHIPS

Class Honors

Scholarship honors are conferred annually for the purpose of encouraging sound scholarship. They are non-competitive and are awarded to every student attaining a required proficiency. Students other than those in the College of Law, who attain the required standard of excellence, are awarded, as Freshmen, honorable mention, and in the other classes, Sophomore, Junior or Senior Honors. Students in the College of Law, qualifying similarly, are awarded either First-year, Second-year or Third-year honors. To be eligible for honors, students, other than second- and third-year students in the College of Law, must carry at least 30 units of work (students in the College of Law must carry at least 24 units), and attain a grade of 2, or better than 2.

Fellowships

The appointments carrying pecuniary aid which are available for students are divided into fellowships and scholarships...the former being more important and valuable. Appointments to fellowships are awarded only to those students pursuing graduate work. The appointments are usually made in May of each year. The student who completes two consecutive semesters with at least thirty units of work and attains the required grade average but who does not fall within any one class group during this full period may be awarded general honors for the year.

COLLEGE OF EDUCATION

THE HISTORY AND ORGANIZATION OF THE BUSINESS COLLEGE

Continuously since 1913, a specialized four-year curriculum leading to the degree Bachelor of Science in Commerce has been offered by the University of Arizona.

In 1916, Dr. Elmer J. Brown came to the University as Professor of Social Science; and for a long period, the Business College was known as the Department of Economics, Business Administration, and Sociology with Dr. Brown as Head, under the College of Liberal Arts. In 1934, the rapid increase in enrollment and interest in business training led to the creation of the School of Business and Public Administration, with Dr. Brown as Director, but still under the Liberal Arts College.

The work in business continued to grow; and in July, 1943, the Board of Regents created the College of Business and Public Administration with Dr. Brown as Dean and with four separate departments: Business Administration, Economics, Secretarial Studies, and Sociology. Since its creation, this college has been the second largest division in the University, usually having 17% to 20% of the entire University enrollment. The only larger college is the College of Liberal Arts. Its staff has also grown vastly. In 1916 the Dean was the only person. This year 29 staff members and four graduate students handling lab sections will be there to help him. The growth of the Business College can be shown in the number of graduates since its beginning. In 1915 there were only 2; in 1925, 8; 1935, 39; 1945, 26. Since the war, enrollment has increased nearly 8-fold. In 1946 there were 37 graduates; in 1951, 169.

The following table compares the enrollment in the Business College with total University enrollment for the past ten years.

Year	Enrollment in Business College	University Enrollment	Percentage of Total
1940-41	445	2922	15.0
1941-42	416	2789	14.9
1942-43	391	2523	15.5
1943-44	267	1860	14.5
1944-45	298	2239	13.3
1945-46	578	3445	16.4
1946-47	915	5062	18.0
1947-48	1138	5676	20.0
1948-49	1213	6044	20.0
1949-50	1282	6502	19.7
1950-51	1207	6227	19.2

In 1949, the Bureau of Business Research was created as a part of the College with Dr. L. W. Casady as Head. This department is organized for the purpose of practical investigation and study of business and economic problems. Its objectives are the collection, analysis, arrangement, and dissemination of economic facts in order to promote the development and utilization of the state's resources; to assist business and governmental units intelligently; to deal with present problems and to plan for the future; and to train and assist faculty and students in the field of business and economic research.

Our College of Business belongs to an accrediting Association: the American Association of Collegiate Schools of Business.

In the Business library there are books worth \$1250.00 and periodicals valued at \$750.00. The machines and other equipment used for secretarial studies and statistics are valued at \$24,000.00

Two degrees are given in this College: The Bachelor of Science in Business Administration, with a choice of ten majors; and Bachelor of Science in Public Administration with a choice of three majors. (Although the courses in Economics and Sociology are taught in this College, and the departments of Economics and Sociology are for administrative purposes of this College, students majoring in these two fields are officially registered in the College of Liberal Arts and received their degrees from that college.

Majors and Minors

Students in this College select a major field of concentration from a list in the section of a catalog devoted to the College of Business, but do not need a minor. The student should select about 80 units from the required courses, 20 units for his major, and about 25 units of free electives which may be taken in any division of the University and in courses in which the student is interested and for which he is eligible or has the prerequisites.

For the past School year the apportionment of majors was as follows:

	%
Accounting	13.5
Advertising	6.4
General Business	24.6
Marketing	10.7
Personnel	4.5
Secretarial Studies	4.4
Finance	3.8
Others	32.1

Proposed U. A. Business, Public Administration Building

Here is an architect's drawing of the proposed \$750,000 new business and public administration building scheduled for construction at the University of Arizona this fall. It will contain four stories, 60,000 square feet of floor space, 21 classrooms that will accommodate 1,350 students, six laboratories accommodating 250, and 35 offices plus the main suite of administration offices. James MacMillan, the

architect, expects to have the plans and specifications completed by late in August; the state board of regents then will ask for bids on the structure. The architect hopes to get it under construction in September and have it completed by August in 1952. It will be located west of the college of engineering and east of the education college and humanities building.

COLLEGE OF BUSINESS AND PUBLIC ADMINISTRATION

The college of Business and Public Administration is a professional college which combines a broad cultural background with an opportunity for concentration in fourteen professional fields of study:

- | | |
|------------------------------|------------------------|
| 1. Accounting | 8. Personnel |
| 2. Advertising | 9. Secretarial Studies |
| 3. Business Economics | 10. Business and Law |
| 4. Finance | 11. Teaching Commerce |
| 5. General Business | 12. Government Service |
| 6. Industrial Administration | 13. Foreign Service |
| 7. Marketing | 14. Social Work |

The degree of Bachelor of Science in Business Administration will be conferred upon students who complete a curriculum in one of the first 10 fields.

The degree of Bachelor of Science in Public Administration will be conferred upon students who complete a curriculum in one of the fields 12 to 14.

Requirements

The required work for this degree is divided into three groups:

1. Courses required of all students to provide a cultural background and an appreciation of the physical and social environment, such as English, science economics, together with a knowledge of subject matter basic to all types of business: accounting, business law, statistics, and principles of organization and administration.

2. Courses in their major field of concentration.

Opportunity to concentrate is provided in ten major fields. The choice of such a major should be made as early as possible and in no case later than the junior year. Students who are uncertain as to the field of work for which they are best qualified are urged to consult the Student Guidance Office before selecting a major.

3. In addition, students will choose electives to make a total of 125 units.

4. At least 40 units must be selected from courses numbered above #99 which is the last lower division course.

Curriculum required of all students working for the degree:

Freshman Year

Course	Units
Introduction to Business	3
English	6
Economic Geography	3
Science (Chemistry, Zoology, or Botony)	8
Physical Education	2
Military Science (Men)	2
Orientation (Women)	2
Electives	<u>2</u> Total <u>32</u>

Course	Sophomore Year	Units
Principles of Accounting		8
Economics		6
Humanities		8
Mathmatics of Commerce		4
American Government		6
Military Science (Men)		2
Physical Education (Women)		<u>2</u> Total <u>34</u>

Junior and Senior Years

All the following courses are required during the junior and senior years. In addition to these required courses, students will select a major of 20 units and sufficient electives to make a total of 125 units. No student will be admitted to any upper-division course in the College of Business and Public Administration who has not completed 56 units, including the necessary prerequisite courses.

Course	Units
Business Law	6
Statistical Methods	4
Marketing	3
Business Organization and Management	6
Money and Banking	3
Advanced Economic Theory	3
Major	20

In addition to these courses required of all, each student must complete the requirements in one of the major fields listed above. For graduation, scholarship average of 3.000 is required for all courses undertaken in the major field at the University of Arizona. At least 50 percent of the courses offered in the major field must be taken in residence.

In order to be admitted to the College of Business, and applicant must offer credits under one of the following plans:

Plan A: English, 3 units; foreign language, 2 units (one subject); elementary algebra, 1 unit; plane geometry, 1 unit; history, 1 unit; elementary algebra, 1 unit; plane geometry, 1 unit; electives, 6 units.

Plane B: English, 3 units; algebra, 1 unit; mathematics; lab science, art, music or commercial studies; electives, 5 units.

COMMERCE CLUB

UNIVERSITY OF ARIZONA

TUCSON, ARIZONA

HISTORY OF THE COMMERCE CLUB

Early in 1950 Dean E. J. Brown of the Business College called in for a conference one of his outstanding students, Albert H. Holmberg. Dean Brown felt that there was a need for two professional business fraternities on the campus. Due to the fact that the Dean was affiliated with Alpha Kappa Psi, he needed someone who was capable of interesting a desired number of students in forming a new organization.

Thru Mr. Holmberg's efforts a meeting was held in the Santa Rita Hotel on December 14, 1950 at 8:00 P.M. for a group of selected juniors and seniors. J. D. Thompson, Assistant Grand Secretary-Treasurer of Delta Sigma Pi, flew to Tucson from Chicago to present the group with literature and color slides in conjunction with a persuasive talk. Approximately thirty of those present expressed interest.

This group met weekly after Christmas vacation until the end of the semester, selecting officers and committees, laying the ground work for a "smoker" to gain the interest of other men, and selecting desirable projects.

This group met weekly after the beginning of the second semester, and finally held the "smoker". About ten men became actively interested and joined the organization.

Until the end of the semester two projects were completed and a third was begun.

The initial project of the Commerce Club consisted of a lecture on "How to Write an Examination." The address

was given by A. H. Holmberg who is a special student in the Business College, a former student at Northwestern and Harvard universities, and a member of the Commerce Club. A large group of university students from the various colleges attended.

Next the club members toured the Valley National Bank of Tucson. The Valley National Bank is a statewide organization with banks in nine of Arizona's major cities. Mrs. E. C. Breazeale, Assistant Cashier, conducted the tour which covered every phase of the banking business. After having viewed the various activities of the bank, Vice President Mundy Johnson informed the club of the importance of having a stable bank in every community.

The third undertaking is by far the largest. Due to the fact that Tucson has no Better Business Bureau, and several townspeople have been victims of unscrupulous advertising, the Commerce Club formed a special committee to make a study of several of the nations Better Business Bureaus and to gather the information necessary to convince the Tucson merchants of the value of having one. Although still in the initial stages, we have hopes of a worthwhile and interesting project along with eventual success.

Mr. Paul Carroll, President
Commerce Club
Hopi Lodge
Tucson, Arizona

Dear Paul,

In an attempt to better coordinate the student clubs in the College of Business, Joe Mitchell, President of Alpha Kappa Psi, has suggested that the presidents of the clubs get together to talk over "affairs."

Would it be convenient for you to meet with Joe and me at 4:30 Thursday, May 10 in B.P.A. 210?

Sincerely,

(Mrs.) Rachel Maynard
Secretary to the Dean

Mrs. Ella C. Breazeale
Valley National Bank
Tucson, Arizona

Dear Mrs. Breazeale

On behalf of the Commerce Club, I would like to thank you very much for the enjoyable tour through the bank.

I know all of the boys found the workings and processes of the Valley National very interesting and instructional. We particularly enjoyed watching the operation of the IBM machine and the tour through the vaults.

Thanks again.

Yours very truly,

Max E. Wilson

OFFICE OF THE PRESIDENT

TUCSON

August 21, 1951

Central Office of Delta Sigma Pi
222 West Adams Street
Chicago 6, Illinois

Gentlemen:

I have been requested to write in support of the petition of a group of our students for the establishment of a chapter of Delta Sigma Pi at the University of Arizona, and I am most happy to comply with this request.

In the first place, I am convinced that the establishment of a chapter of this distinguished professional fraternity would bring added distinction to the University and that the presence of such a chapter through the years would do much to stimulate outstanding work on the part of our students in the College of Business and Public Administration and, in general, to aid the scholastic attitude and professional spirit of the students.

LETTERS
OF
RECOMMENDATION

In the second place, in so far as I am in a position to judge the qualifications which students must meet to be deemed worthy of charter membership in a chapter of Delta Sigma Pi, it is my belief that the members of the petitioning group meet these qualifications, and I recommend them to you with enthusiasm.

It is indeed my hope that Delta Sigma Pi will see fit to establish a chapter at the University of Arizona.

Sincerely yours,

Robert L. Nugent
Vice President

OFFICE OF THE DEAN OF MEN

August 21, 1951

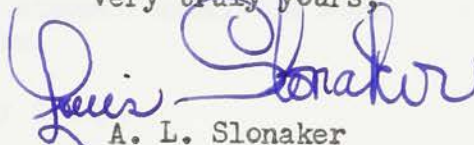

Delta Sigma Pi Fraternity
222 West Adams Street
Chicago 6, Illinois

Gentlemen:

Last spring on the third of May the Committee on Student Activities and Eligibility recognized a new organization on the campus of the University of Arizona designated as the Commerce Club. This Committee, of which I am the Chairman, has the responsibility of considering petitions from all new groups on our campus.

It is my understand the Commerce Club desires to become affiliated with Delta Sigma Pi. This club is endorsed by our College of Business and Public Administration and it is the opinion of the Dean of that College, Dr. E. J. Brown, there is room on the Arizona campus for a chapter of your fine fraternity. I am very glad to endorse the Commerce Club without any reservations and I hope Delta Sigma Pi will see fit to grant a charter on the campus of the University of Arizona.

Very truly yours,

A. L. Slonaker
Dean of Men

ALS:T

University of Arizona

TUCSON

COLLEGE OF BUSINESS
AND PUBLIC ADMINISTRATION

August 20, 1951

Delta Sigma Pi
222 West Adams Street
Chicago 6, Illinois

Gentlemen:

I understand that the young men on our campus who are petitioning for admission to Delta Sigma Pi need a letter from the Dean of the College of Business.

Dean Brown is away from the campus until September 10. I feel sure that he will be glad to make a statement approving the establishment of a chapter of Delta Sigma Pi on this campus, but also feel that he would prefer to write the letter when he returns to his office. The Dean has several times made the statement that our College is big enough for another professional fraternity and he has also said that Delta Sigma Pi would provide healthy competition for Alpha Kappa Psi.

Will you accept this statement until the Dean returns and can write you again.

Yours very truly,

(Mrs.) Rachel Maynard
Secretary to Dean Brown

222 N. Grande Avenue
Tucson, Arizona
August 21, 1951

The Central Office of Delta Sigma Pi
222 W. Adams Street
Chicago 6, Illinois

Brothers:

The Commerce Club of the University of Arizona has requested that I address a communication to you in behalf of that Club's petition to the International Fraternity of Delta Sigma Pi for a Chapter at the University of Arizona.

For the past nine months I have known all of the principal officers of The Commerce Club, and during the past several months I have met many of the members of this club. I have been in attendance at a number of the meetings of this club and have observed them form and operate this club.

It has indeed been a pleasure to know these men, to see their organization develop, and to see them function as a group. It is my belief that this group meets all of the prerequisites for a Chapter of the fraternity. It is without hesitation that I recommend this group to The Grand Council of the International Fraternity of Delta Sigma Pi for a Chapter of the fraternity.

Fraternally yours,

William E. John
Life Member Delta Sigma Pi
