Davenport of the Present

The County Seat of Scott County, Iowa, with a population of 95,796 (1966), Davenport today is the largest city in the state of Iowa on the west bank of the Mississippi River, and ranks high as a retail and business center.

It is the metropolis of the Quad-Cities, and is located on the north bank of the river, 352 miles southwest of Minneapolis, 170 miles west of Chicago, 320 miles east of Omaha, and 240 miles north of St. Louis. It is situated in the heart of the greatest agricultural center of the country. Davenport is within overnight traveling distance of the great metropolises of the Mid-West. Here, where the Mississippi River forms the boundary between Iowa and Illinois, the Flow of the river is from the east to the west, although the normal course of the river is from north to south.

an Aldermanic form of government, with a Mayor and ten (10)

Aldermen. Davenport has eight wards and twenty-nine precincts.

The city covers an area of fifty-nine square miles, and is 579 feet above sea level. It has a normal mean temperature of 49.9 degrees Fahrenheit. The average annual rainfall is 38.3 inches.

Davenport is one of the four special charter cities in Iowa. It has

The other three cities completing the Quad-City area are, East

Moline, Moline, and Rock Island. Located in these cities are

Deere and Co., J. I. Case, International Harvester, Caterpillar, Eagle Signal, Alcoa and the Rock Island Arsenal, these companies make our area the acknowledged farm equipment and manufacturing capital of the world.

The Mayor is the chief executive officer of the City and administers the criminal laws of the State and the Ordinances of the City. In April, 1963, a Municipal Court was established to replace the Police Magistrate Court. There are two Municipal Court Judges, a Court Clerk, a Bailiff, and other office personnel. Certain established Commissions and Boards assist the Mayor, the members of which are appointed by the Mayor, subject to approval and confirmation by the City Council. These include the Levee Improvement Commission, Board of Library Trustees, Board of Trustees in connection with the Davenport Municipal Art Gallery, City Plan and Zone Commission, Airport Commission and various other Boards and Commissions. The members of these Commissions are all citizens of Davenport, together with certain City officials who serve as ex-officio members, serving with no fee or pay.

The present Mayor maintains an "open-door" policy, in that citizens of Davenport may come in to see him on any matters or questions, and all phone calls are received freely. The Mayor also attempts to

meet with the various Committees. Boards and Commissions which require his attendance. In addition to these regular and required duties of Mayor, he is often called upon to make welcome addresses to the many conventions and meetings held both on local and statewide levels. He also issues proclamations, and attends many civic affairs, including ribbon-cutting ceremonies and similar affairs. The region around Davenport was first settled in 1808. In the fall of 1835 a group of men met at the home of Colonel George Davenport on Rock Island (Arsenal) and agreed to survey a town. It was the area purchased by Antoine LeClaire in 1833 for \$100.00, that was sold to the company for \$2,000 and surveyed for the town of Davenport in the spring of 1836. The lots sold in May of 1836 to prospective purchasers from St. Louis brought \$300.00 to \$600.00 much less than anticipated. Lumber for the first Davenport buildings came from Cincinnati by water, as did not other merchandise and materials. First religious services on record were held by a Rev. M. Gavitt, Methodist, in the home of D. C. Eldridge, the merchant.

The first frame house in Iowa was erected here in 1832. Davenport was incorporated as a town in 1839 and chartered as a city in 1851. In 1853, the first bridge was started, to span the Mississippi, and opened to traffic here in 1856. There were seven houses here at the end of 1836, and fifteen at the close of 1857, with 150 residents.

From its beginning, the balanced agricultural, commercial and industrial development of Davenport and its tributary territory has been influenced by the Mississippi River as a transportation agency.

PART II

THE HISTORY OF ST. AMBROSE COLLEGE

The Local Setting

In the late 1800's America was sail young. Durenport, located in the owner of the agricultural midwest, shared the youthful optimism of the country. Few of the citizens had had an education beyond grammar school, but all were anxious to provide a better lot for their children than had been their cwn.

Working with the citizens, one of the prime concerns of the Most Reverend John McMullen, the first bishop of Davesport, was to educate youth. In

times lacked the hance college level of study. The college provided for

The Local Setting

In the late 1800's America was still young. Davenport, located in the center of the agricultural midwest, shared the youthful optimism of the country. Few of the citizens had had an education beyond grammar school, but all were anxious to provide a better lot for their children than had been their own.

Working with the citizens, one of the prime concerns of the Most Reverend John McMullen, the first bishop of Davenport, was to educate youth. In 1882, one year after the founding of the Diocese of Davenport, he set aside for this purpose two rooms at old St. Margaret's School, now Sacred Heart Cathedral, and engaged two instructors for a handful of young men.

Three years later the central unit of Ambrose Hall was dedicated on its present site; the same year St. Ambrose was incorporated as a "literary, scientific and religious institution." Although it was officially known as St. Ambrose Seminary until 1908, young men not aspiring to the priest-hood soon outnumbered the seminarians. In fact, the Articles of Incorporation stated: "No particular religious faith shall be required of any person to entitle him admission to said seminary."

Since many of the students came from rural areas they therefore sometimes lacked the basic college level of study. The college provided for their needs by giving them a special five month program known as the "Prep" course.

Then there were the boys of high school age from the city, the day students, they had all been provided with a thorough education of the schools of the time.

On the whole, St. Ambrose was filling a definite need among the Catholics of the city and the diocese quite successfully.

Early Student Body

The college catalogue lists 86 names for the year 1900/01, and 102 for the following year, although there were not that many present at any one time. Only 13 are listed as of collegiate rank in the year 1901.

Early Courses of Study

The College offered three distinct courses of study, the Commercial, the Academic, and the Collegiate.

COMMERCIAL COURSE: The aim of this course was to give a practical and thorough commercial education. The course proper was completed in two years. A preparatory course of one year had been arranged to meet the needs of those students whose previous attainments were below the standard required for taking up the study of book-keeping.

ACADEMIC COURSE: This course corresponded in large measure to a high school course. Evidence of the completion of work equivalent to that of the eighth grade of grammar school was required of those who sought admission to this course. Candidates who were found deficient in some of the requirements could take advantage of the preparatory work offered in connection with the commercial course. The study of the ancient classics was optional in this course.

COLLEGIATE COURSE: In its Collegiate Department the college offered a four years course in advanced studies. The efficiency and
scope of the work in this department of the college had kept pace with
its growth in other respects. "Our aim will always be to make our
collegiate course the equal of similar courses in the best colleges."
No one was admitted to this course who had not completed satis—
factorily the full academic course, including Latin and Greek.

Extra-curriculars

As the college progressed, it widened its scope of extra-curricular activities for the benefit of a well-rounded education, one that the college has always achieved; such activities included: the St. Thomas Literary and Debating Society, the Logomachetean Literary Society; an excellent band, orchestra, and choir; and vigorous athletic schedules that encompassed rugby, baseball, football, tennis, golf,

and track and field events.

Movement to the Present

Diocesan priests, supported by lay colleagues, not only kept abreast of the times but often were ahead of the times in their unique adventure in higher education. In 1929 the doors of the College were opened in the late afternoon and evening classes to young women. This continued for ten years, that is, until St. Ambrose encouraged the opening of her sister college, Marycrest. The fall semester of 1968 again saw the admission of young ladies. St. Ambrose went co-educational.

During World War II the United States Navy chose St. Ambrose College, because of its location, facilities, and faculty, for the training of officers. In October 1945 Secretary James V. Forrestal concluded this arrangement by bestowing on St. Ambrose College the United States Navy's Certificate of Commendation.

Immediately students from every part of the United States began to enroll. Part of this was due to the GI Bill; part due to our reputation in athletics; and part was due to the alumni, whom people had met, respected, and admired. With this rapid and continued growth, the College welcomed the additional space made available in 1958, the year the high school department moved into new quarters at Assumption High School.

Today

Today St. Ambrose has grown to an institution of eight major buildings, over one hundred faculty members, and twenty-four major areas of concentration. More than six thousand people claim St. Ambrose as their alma mater, and each year more than 1,200 full-time students continue their education in order to receive their degree.

St. Ambrose College is located on six blocks of residential area in northcentral Davenport. The buildings are grouped on the south two-thirds of the campus with the athletic fields and parking areas on the north.

Ambrose Hall once housed the entire College. Today its four wings contain a Chapel, the dining rooms, Ambrose Towers, the college post-office, classrooms, and college center.

LeClaire Gymnasium, built in 1916, houses both the office and equipment of the Department of Physical Education. The gymnasium proper and the swimming pool were remodeled and modernized during the summer of 1963.

Ground was broken for the new College Chapel of Christ the King, on April 24, 1952. It was completed in the fall of 1953 and dedicated on December 2, 1953. Of contemporary design, the building seats 530 students.

The Library-Administration Building, erected in 1941, is a fire-proof structure of Collegiate style. The first floor houses the administrative offices, the guidance office and the faculty lounge. The general reference and reading rooms are located on the second floor; the main stack room contains over 60,000 volumes. A part of this collection has been secured through the generosity of benefactors. The newly established browsing library is housed on the lower level as is the expanded placement office. The erection of this building was made possible through gifts from "The Friends of St. Ambrose."

The Music Building, a former Naval Officers Quarters, was provided and rebuilt by the War Assets Corporation in 1948. A much needed addition, it contains two rehearsal rooms, twelve practice rooms, six studios, a student lounge, a music library, an instrument room, and a wardrobe room.

The four stories of Lewis Memorial Science Hall, completed in 1930, are devoted exclusively to classrooms and laboratories. Additional faculty offices are in the basement. The building, which harmonizes in design with Davis Hall, was made possible through the generosity of Frank J. Lewis, K.S.G., and the priests of the Davenport Diocese. Hayes Hall, completed in 1967, serves as the residence for sixty-five seminarians and eight faculty members. This new building, adjacent

to Christ the King Chapel, also contains eight classrooms on the ground floor and recreational facilities on the lower level.

Davis Hall, a modern fire-proof structure of Tudor Gothic style, was built in two sections which were completed in 1922 and 1927, respectively. Then in 1960 it was remodeled. The upper four floors provide rooms for faculty members and students; in the basement are the College Book Store and faculty offices.

East Hall, a new dormitory first occupied in the fall of 1959, houses
248 students in double rooms with one suite for a priest prefect on each
floor. It is of contemporary design.

St. Ambrose is currently engaged in a building project that includes:

a Fine Arts and Communications Center (1970), a Physical Education

Center (1972), and a Dormitory-Food Service Center-Student Union

(completed December 1969).

Objectives

St. Ambrose is a liberal arts college for men and women. Operated by the Catholic Diocese of Davenport, it provides courses in higher education in an environment that is oriented to the Christian way of life and culture. St. Ambrose College holds that a man can achieve the greatest measure of happiness only if his understanding of the meaning of life is based on Christian truth about man's relation to his Creator and the world in which he lives. In keeping with this basic principle, the College aims

to impart to the student an integrated body of knowledge which will enable him to solve with some success the problems of Christian living and to derive greater satisfaction and enjoyment from life.

As an institution of higher learning, the College has as its primary purpose the intellectual development of the student. However, the College is also aware that the student wants advanced training which will improve his opportunity to earn a living. The curriculum is designed to meet both of these objectives. In general, the student devotes his first two years to a liberal education in the various areas of arts and sciences; in the last two years the student devotes more of his academic schedule to acquiring a major in an area of the curriculum which is related to his chosen career.

Granted that intellectual development of the student is its most important work, the College also feels an obligation to contribute to his physical, social, cultural, and spiritual growth. The College is concerned that the student develops a healthy body as well as a healthy mind; acquires habits of moderation and self-control as well as mature social attitudes and the desire for learning. It strives to provide a democratic atmosphere, based on the Christian doctrine of love in which the student can acquire habits of thought and action which will enable him to exert a constructive influence on society.

Accreditation and Membership

St. Ambrose College is registered by the State Board of Regents of New York.

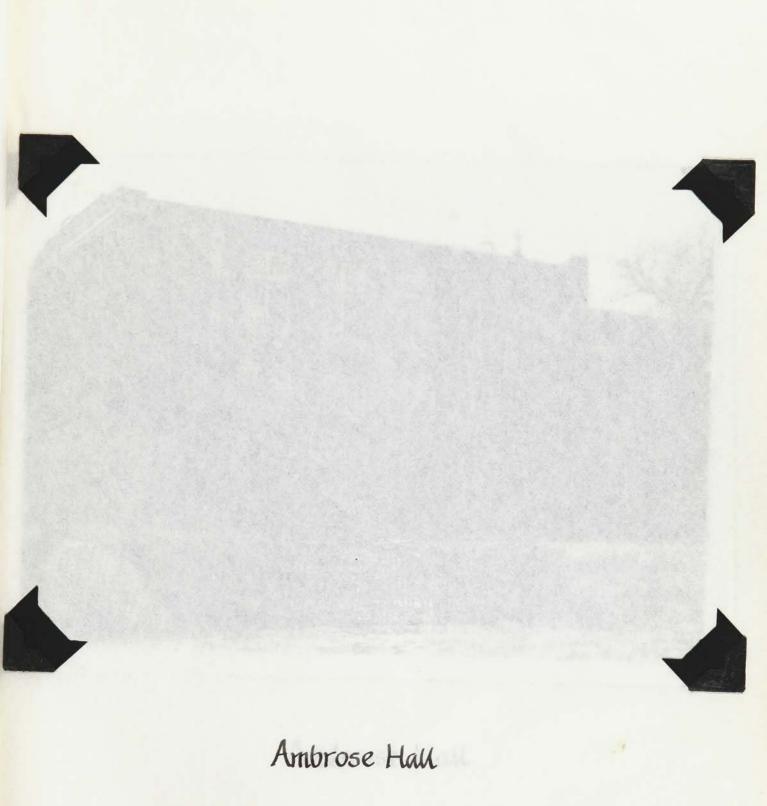

It is accredited by the North Central Association of Colleges and Secondary Schools and the Iowa Department of Public Instruction.

Membership is held in the National Catholic Education Association, the Association of American Colleges, the American Council on Education, American Association of Colleges for Teacher Education, the National Conference of Church-Related Colleges, and the National Commission on Accrediting (not an accrediting agency).

Conclusion

St. Ambrose College will continue to meet the needs of young men seeking a Christian higher education by expanding with the community and the world.

As a final note, we would like to mention that the information used in the formation of this <u>Brief History</u> has been mainly procured from the various St. Ambrose College catalogues from its beginning and from Contributions to the History of St. Ambrose College, by the Rt. Rev. U. A. Hauber, (class of '05) Alumni Historian in 1951.

Department of Economics and Business Administration

The Department of Economics and Business Administration was formally organized under that title in 1954. It had been listed, prior to this, under the Commerce division of the Social Sciences, and with the reorganization it was listed separately, distinguishing it from the Department of Accounting and other Social Sciences.

Since its re-organization, four men have served as its chariman, Mr. Lloyd W. Bowie from 1956 to 1957, Dr. Peter L. Danner from 1957 to 1963, Mr. Robert M. Mulligan for 1963 to 1964 and Mr. Gerald L. Hamel from 1964 to present.

Under Mr. Hamel's direction, the department has experienced steady growth. Presently over 300 students are majoring in the area of Economics and Business Administration. This represents approximately 25% of the total student enrollment of St. Ambrose College.

This figure has changed since 1954. The department has always had the largest enrollment of any other department in the college, and has increased its enrollment more than any other department.

One of the prime reasons for this, is the departments philosophy of education. In response to the question "What are the goals of the Business Department" put to Mr. Hamel during an interview for

the school paper, he responded, "We are trying to produce a well rounder person. A well rounded student is one that is truly educated. He is creative, can think for himself and can communicate his ideals we want to get away from vocational training, thus we have our present curriculum, which instead of placing emphasis on one major area of study, tries to give the student a broad business background." Another feature of the Department is the fact that every student with a major in Business, is required to minor in Economics. The theory behind this being that an effective business graduate cannot be so without a firm foundation of theoretical economics. St. Ambrose was a pioneer in this type of program, being one of the first in the country to utilize the compulsory Economics minor. The present trend among the nations colleges and universities is to follow suit with this type of Program.

Over the years, the department has proven itself by the type of graduate it produces, by its professors and by attracting large companies to the campus. Many of its graduates have established themselves in the world of business, education and government. Robert Wahl, who graduated in 1948 with a B.A. in Business, is President of the Wahl Clipper Corporation. Robert Callery, a 1951 graduate with a

degree in Economics; serves as President of the Revlis Mortgage

Corporation in St. Paul, Minnesota. Robert Trosk, who serves as
the United Nations Economic Affairs Office in the Middle East, graduated in 1951 with a B.A. in Business Administration. A 1963 graduate with a degree in Economics, John Heinke now teaches Economics
for the Department of Economics at the University of Santa Clara in

Santa Clara, California.

Former professors include the Honorable Clay LeGrand, now a Justice on the Iowa Supreme Court. He taught law from 1962 to 1963. A graduate of the London School of Economics and presently an economic advisor to Senator Hughes (D. Iowa), Pat Deluhery taught Economics at St. Ambrose from 1966 to 1968.

Representative of the nations large business' who visit the campus each year to interview students from the Department are; I.B.M., ALCOA, Oscar Mayer, Firestone Tire & Rubber Co., Xerox, Standard Oil Co, and John Deere. The list goes on and on. This shows the confidence that American Business has in a St. Ambrose graduate in the field of Economics and Business Administration.

Other areas of progress which have developed under Mr. Hamel's direction are the establishment of a statistics lab and computer

degree in Economics; serves as President of the Revlis Mortgage

Corporation in St. Paul, Minnesota. Robert Trosk, who serves as
the United Nations Economic Affairs Office in the Middle East, graduated in 1951 with a B.A. in Business Administration. A 1963 graduate with a degree in Economics, John Heinke now teaches Economics
for the Department of Economics at the University of Santa Clara in

Santa Clara, California.

Former professors include the Honorable Clay LeGrand, now a Justice on the Iowa Supreme Court. He taught law from 1962 to 1963. A graduate of the London School of Economics and presently an economic advisor to Senator Hughes (D. Iowa), Pat Deluhery taught Economics at St. Ambrose from 1966 to 1968.

Representative of the nations large business' who visit the campus each year to interview students from the Department are; I.B.M.,

ALCOA, Oscar Mayer, Firestone Tire & Rubber Co., Xerox,

Standard Oil Co, and John Deere. The list goes on and on. This shows the confidence that American Business has in a St. Ambrose graduate in the field of Economics and Business Administration.

Other areas of progress which have developed under Mr. Hamel's direction are the establishment of a statistics lab and computer

center. Made available by a Government Grant, the Stat Lab features 24 electronic calculators at a cost of approximately \$600.00 each. The lab will be used in conjunction with the Accounting Department. The Computer Center, established in 1967, has a direct link to the Computer Complex at the University of Iowa in Iowa City. Using the center, a student may obtain the answer to any question in a matter of seconds. A course in Computer Programming is offered each semester and covers current and relative problems in programming. Currently the department employs 11 faculty members (6 full time and 5 part time). This is an increase in 2 full time members since the departments reorganized in 1954.

The department is proud of the type of graduate it produces. Nearly 50% of its graduates continue on to Graduate School. And on the average, its graduates score higher than any other graduates in the Graduate Record Exams.

What further proof is needed to show that the Department of Economics and Business Administration is a current and progressive department with the future of its graduate in mind.

History of Chi Sigma Alpha

Chi Sigma Alpha began in the fall of 1998 in the mind's eye of its
first president. Econoth Juschko. Yournbut for the privilege of telonging to a professional fraternity. Hen revealed his thoughts to
Patrick Welch, economics instructor from the Department of Economics
and Business Administration at St. Ambrose College. Together they decided to explore the possibilities of forming such an organization.

After viewing many well qualified fraternities, it was decided that the
International Praternity of Delta Sigma Pi had the best to offer, both
socially and professionally.

PART IV

HISTORY OF CHI SIGMA ALPHA FRATERNITY

was laid.

On February 13, 1969 the committee met with Ben S. Wolfenberger,
Executive Secretary of the International Prateratty of Delta Sigms Pi,
During this meeting, Mr. Wolfenberger discussed the future paths
that should be taken prior to acceptance into the unional organization.
In the weeks inflowing the meeting the committee members met with

History of Chi Sigma Alpha

Chi Sigma Alpha began in the fall of 1968 in the mind's eye of its first president, Kenneth Jeschke. Yearning for the privilege of belonging to a professional fraternity, Ken revealed his thoughts to Patrick Welch, economics instructor from the Department of Economics and Business Administration at St. Ambrose College. Together they decided to explore the possibilities of forming such an organization.

After viewing many well qualified fraternities, it was decided that the International Fraternity of Delta Sigma Pi had the best to offer, both socially and professionally.

A steering committee composed of top business students and faculty members was formed prior to Christmas vacation and the ground work was laid.

On February 13, 1969 the committee met with Ben H. Wolfenberger, Executive Secretary of the International Fraternity of Delta Sigma Pi, During this meeting, Mr. Wolfenberger discussed the future paths that should be taken prior to acceptance into the national organization. In the weeks following the meeting the committee members met with various classmates in an attempt to sell the fraternity. And sell it they did, because almost exactly one month later, on March 20, 1969,

twenty seniors, eighteen juniors, and twelve sophomores were selected from a list of applicants as pledges to the new fraternity.

With the initiation of its first pledge class Chi Sigma Alpha began to roll.

Elections were held, with Kenneth Jeschke elected president and
James Barry elected vice-president.

A tradition was set in early May that will continue annually. All the brothers in the fraternity had what proved to be a very enjoyable day at the Scott County Park. Everyone had a chance to eat and drink their fill, engage in a rugged afternoon of sports, and an evening of "chewing the fat" that seemed to draw everyone closer together. This was perhaps the first time everyone felt a common bond and although there have been many occasions such as this since then, it will be continued yearly in early May to commemorate that first occasion.

Now the fraternity, which still lacked national recognition, turned to working on the petition that was to be submitted to Delta Sigma Pi.

But time soon caught up with the new fraternity and before he could finish what he started, Jeschke graduated. But not before elections were held, this time in mid-May. Kevin McEneely was elected president, Gilbert Cervelli was elected executive vice-president, Barry Wilken was elected vice-president, chancellor was Thomas

Zidlicky, secretary was John Maggio, treasurer was Roderick Saelens, and historian was Thomas Olmsted.

The school year 1969/70 saw many advances for the new fraternity. In October, the fraternity held an all school dance which proved to be the most profitable financially and socially this year. This was accomplished by the social committee headed by Thomas Harvey.

Early in November, Chi Sigma Alpha was invited to a regional conference held at the University of Iowa (Epsilon chapter) at Iowa City. Approximately twenty members attended the conference and were treated to an inside look at the workings of the national organization.

Also during the year, the professional committee headed by Gregory Cofield, provided the school with two outstanding guest speakers.

Henry B. Hook, publisher of the Davenport TIMES-DEMOCRAT, spoke on the topic of "Careers in Communication". Robert Sartorius, Chief Industrial Forecaster for John Deere, spoke on the "Role of the Economist in Industry Today".

With the final revision of the petition, the formally pledged local members of Chi Sigma Alpha are all looking forward to being a part of the International Fraternity of Delta Sigma Pi.

OF THE DEAN

March 3, 1970

Mr. Ben H. Wolfenberger Executive Secretary International Fraternity of Delta Sigma Pi 330 South Campus Avenue Oxford, Ohio 45056

Dear Mr. Wolfenberger:

It is my understanding that a group of our students in Commerce, who are members of Chi Sigma Alpha, is applying to be considered for membership in Delta Sigma Pi.

These students have been in touch with me concerning these matters and their efforts have my generous endorsement. I hope you will give the petition favorable consideration.

Sincerely,

Rev. F. J. McMahan, Ph.D.

Dear Mr. Wolfenberger:

This letter is to inform you that in a meeting of the Student Government Association of St. Ambrose College on March 5, 1969, the Student Senate passed a bill sanctioning Delta Sigma Pi on the St. Ambrose Campus.

With sincere wishes for a beneficial relationship between our two organizations I am

Respectfully yours,

March 10, 1970

Mr. B. H. Wolfenberger Executive Secretary International Fraternity of Delta Sigma Pi 330 South Campus Avenue Oxford, Ohio

Dear Mr. Wolfenberger:

I am writing this letter on behalf of the local fraternity Chi Sigma Alpha, St. Ambrose College, Davenport, Iowa. This group is petitioning for installation as an active chapter of Delta Sigma Pi and I believe this request should be given favorable consideration. I have been affiliated with Delta Sigma since my initiation as an undergraduate, \$\triangle 782\$, at Marquette University in 1955. As a student I served as Delta Chapter president, Senior Vice-President, and chancellor and I treasure my recollection of those days. While I was in Milwaukee during the years 1964-1968 I belonged to the Alumni Club and still count District Director Bob Neimon as a close friend. I have been teaching Economics for seven years and during that time have had numerous contacts with various types of student groups. From my experience both with the fraternity and as a teacher -observor I feel confident that this potential chapter will be an asset to Delta Sigma Pi.

There are many fine people in this petitioning group, some of whom work as assistants in the Economics and Business Department. I feel they have the spirit and sense of values to make them valuable additions to Delt Sig. Of equal importance, I feel that the institutional situation here at St. Ambrose would facilitate the success of a new chapter. There are no social fraternities at this college nor are there likely to be. Business, Accounting, and Economics account for approximately one-thirdof the majors in the college and given the orientation of St. Ambrose and other schools in the area, this is likely to continue.

In summary then I feel that both the individual members and the general situation here warrants favorable consideration of the chapter petition. I warmly recommend such action.

Praternally yours,

James & Mullius

James E. Mullins

Assistant Professor of Economics

DAVENPORT, IOWA 52803

phone 319/324-1681

March 11, 1970

Mr. Ben H. Wolfenberger Executive Secretary International Fraternity of Delta Sigma Pi 330 Campus Avenue Oxford, Ohio

Dear Mr. Wolfenberger:

I am a member of Delta Sigma Pi, Epsilon Psi Chapter of Christian Brothers College, Memphis, Tennessee. I was on the faculty at Christian Brothers at the time they petitioned for membership in the Fraternity, so I am a charter member in that chapter. Some of my most pleasant memories of Memphis are of my association with the Fraternity over a four year period. The Fraternity was of great value to the students, and I am sure the students were of value to the Fraternity.

I believe the same mutually beneficial relationship will exist with the establishment of a chapter here at St. Ambrose College. I have been here only since last September, but I have become acquainted with many of those petitioning for a chapter. I am as impressed with these students as I was with the Fraternity Brothers in Memphis. They appear to be sincerely interested in being of service to the Fraternity, to the school, and to the community. As an example, the Delta Sig pledges have undertaken full sponsorship of St. Ambrose College's participation in the April 22nd nationwide environmental teach-in, and so far they have done an excellent job of organizing and planning. Such willingness to undertake such difficult and useful tasks will make these students valuable additions to Delta Sig now, and to the business community later on.

I, therefore, request that the request of St. Ambrose for a chapter of Delta Sigma Pi be carefully considered and favorably acted upon.

Sincerely,

R. J. Butting ham Robert L. Brittingham
